Heat Pump Dryer Technology

A heat pump dryer uses heat pump technology to generate energy (heat) during the drying cycle. It uses less energy than a traditional electric dryer, recycling the same air instead of constantly venting hot air outside. Additionally, with its ventless design, it is extremely flexible and can be installed almost anywhere.

WHY CHOOSE A HEAT PUMP DRYER?

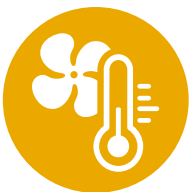

Flexible Installation

A ventless design allows for seamless installation just about anywhere. Perfect for apartments and condos.

Save Energy

More energy efficient than a traditional vented dryer.

Protect Your Clothes

With lower drying temperatures, a heat pump provides a gentle drying environment.

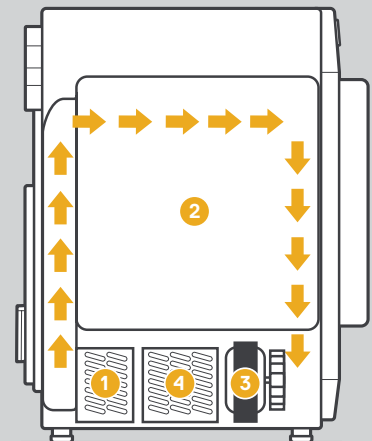

Types of Heat Pump Dryers & How They Work

Traditional heat pump dryers

use a refrigeration system to dry, heat and recycle air before returning it to the drum. After the damp air leaves the drum, energy (heat) is transferred to the refrigerant to remove water vapour from the air as it is cooled. The dry air is then heated and recycled back into the drum.

Hybrid heat pump dryers

operate similar to traditional heat pump dryers but include a secondary heater for increasing air temperature, and speeding up dry times.

Heat Pump Unit

- 1 Air is heated
- 2 Warm air enters the drum
- 3 Moist air is drawn out of the drum
- 4 Air is filtered, and then dehumidified

SLIM & VENTLESS

Do laundry in one appliance that takes up less room and can be installed virtually anywhere* thanks to its slim, ventless design.

LOAD & GO™ PLUS DISPENSER

Skip steps with the Load & Go™ Plus dispenser. Simply add detergent and fabric softener once, and skip refills for 20 loads.Δ

An All-in-One Laundry Solution for Small Spaces

The Whirlpool® all-in-one combination washer and dryer, or “combo” offers you a washing machine and a clothes dryer in one appliance. You can choose to wash only, dry only or wash & dry without any manual intervention. Plus, because they are only one unit, they save space.

Whirlpool® App Controlled

With the Remote Control† function through the Whirlpool® app, you can add a load of laundry to the washer in the morning, but wait to start the cycle so that clean clothes are ready when you are.

Intuitive Controls

Let the washer guide you to the right cycle combinations. You can get instant access to the settings you use most with a touchscreen that learns, adapts and suggests customized presets.

Largest Capacity in its Class‡

At 3.2 cu. ft. (I.E.C.), it provides enough room for large loads, while still fitting in the space that's convenient for your family

* 240V electrical connection required.

† Appliance must be set to remote enable. WiFi & App required. Features subject to change. For details and privacy notice, visit whirlpool.ca/connect
